

# New Technology in Cardiac CT Scan Low Radiation Dose Protocol

**Illinois Heart and Vascular** now uses the Step and Shoot technology. This is a low radiation dose protocol for Cardiac CT, lowering the radiation exposure for your patients by approximately 80%.

Using this new protocol, the radiation from a cardiac CT is actually less than that of many other diagnostic studies.

## The Step and Shoot Protocol

- Reduces radiation by 80%
- Faster and safer for patients
- Clearer image technology

**Illinois Heart and Vascular**, continuing to provide the most advanced cardiac care available.
